

Older Drivers: Is it Time to Give Up Driving?

We all age differently. For this reason, there is no way to set one age when everyone should stop driving.

To help decide, ask yourself:

- Do other drivers often honk at me?
- Have I had some accidents, even if they were only "fender benders"?
- Do I get lost, even on roads I know?
- Do cars or people walking seem to appear out of nowhere?
- Do I get distracted while driving?
- Have family, friends, or my doctor said they're worried about my driving?
- Am I driving less these days because I'm not as sure about my driving as I used to be?
- Do I have trouble staying in my lane?
- Do I have trouble moving my foot between the gas and the brake pedals, or do I sometimes confuse the two?
- Have I been pulled over by a police officer about my driving?

If you answered "yes" to any of these questions, *it may be time to talk with your doctor about driving or have a driving assessment.*

What to do if you Fall

Whether you are at home or somewhere else, a sudden fall can be startling and upsetting. **If you do fall, stay as calm as possible.**

- Take several deep breaths to try to relax.

Remain still on the floor or ground for a few moments. This will help you get over the shock of falling.

- Decide if you are hurt before getting up. Getting up too quickly or in the wrong way could make an injury worse.
- If you think you can get up safely without help, roll over onto your side. Rest again while your body and blood pressure adjust. Slowly get up on your hands and knees, and crawl to a sturdy chair.
- Put your hands on the chair seat and slide one foot forward so that it is flat on the floor. Keep the other leg bent so the knee is on the floor. From this kneeling position, slowly rise and turn your body to sit in the chair.
- If you are hurt or cannot get up on your own, ask someone for help or call 911. If you are alone, try to get into a comfortable position and wait for help to arrive.
- Carrying a mobile or portable phone with you as you move about your house could make it easier to call someone if you need assistance. An emergency response system, which lets you push a button on a special necklace or bracelet to call for help, is another option.

BE KIND... for everyone you meet is fighting a battle you know nothing about.

May the **holiday season** fill your home with peace, your **heart** with love, and your **life** with gratitude.

FIGHT FLU

No More Excuses: You Need a Flu Vaccine

The more people vaccinated, the more people protected.

Do your part. Make an appointment to schedule your flu shot today.

Why is it important for Influenza (Flu) vaccines to be given during the COVID-19 pandemic:

Efforts to reduce the spread of COVID-19, such as stay-at-home and shelter-in-place orders, have led to decreased use of routine preventive medical services, including immunization services.

✳ Ensuring that people continue or start getting routine vaccinations during the COVID-19 pandemic is essential for protecting people and communities from vaccine-preventable diseases and outbreaks, including flu. Routine vaccination prevents illnesses that lead to unnecessary medical visits and hospitalizations, which further strain the healthcare system.

✳ For the flu season, flu vaccination will be very important to reduce flu because it can help reduce the overall impact of respiratory illnesses on the population and thus lessen the resulting burden on the healthcare system during the COVID-19 pandemic.

✳ A flu vaccine may also provide several individual health benefits, including keeping you from getting sick with flu, reducing the severity of your illness if you do get flu and reducing your risk of a flu-associated hospitalization.

Things to do in 10-15 minutes to reduce stress:

- ✓ Write three things you are grateful for today.
- ✓ Check in with a friend, family member or neighbor. Talk by phone, video chat or visit in person while maintaining proper distance and wearing masks.
- ✓ Close your eyes, take deep breaths, stretch and meditate.
- ✓ Take a break from the news today...watch or listen to something fun.
- ✓ Take a dance break!

✳ Reminders for Your Office Visit ✳

- Bring your **prescription bottles** or **list of medication** to your visit.
- Do you need **medication refills**? Tell us at your office visit.
- Did you let us know if you have **any change(s) in your personal information** such as address, phone number and insurance?
- Do you need a **Referral for a Specialist** or do you need **further testing outside of our office**? You may need to call your insurance plan to verify your coverage.
- Did you check if your plan **covers Well care or a Physical**?
- Are you up-to-date on your screenings for **Mammogram** and **Colonoscopy**? **Are you due for one?** Ask your MD.
- Are you being referred by your PCP to get any **radiology test(s)**? If so, please let us know in case you need a **Pre-certification**.
- Is your **Immunization record** up to date? Please update us.
- Are you **Pre-Diabetic**? Have you discussed this with your MD?
- Did you get a **Summary of your Visit** today? If not, please ask for it before leaving.
- Do you need to make a **Follow-up appointment**? **Please stop at Check-out and make an appointment before you leave.**

No More Excuses: You Need a Flu Vaccine

Get the Facts

- The flu vaccine is safe, does not cause the flu, and can protect the ones you love.
- Spread the word and **GET VACCINATED!**

Even healthy people need a flu vaccine.

Influenza (flu) is a contagious disease which can lead to serious illness, including pneumonia. Even healthy people can get sick enough to miss work or school for a significant amount of time or even be hospitalized. An annual flu vaccine is recommended for everyone 6 months of age and older. Pregnant women, young children, older people, and people with certain chronic medical conditions like asthma, diabetes and heart disease are at increased risk of serious flu-related complications, so getting a yearly flu vaccine is especially important for them.

Is the flu vaccine safe?

Yes. The flu vaccine is safe. Hundreds of millions of Americans have safely received flu vaccines over the past 50 years, and there has been extensive research supporting the safety of seasonal flu vaccines. Each year, CDC works closely with the U.S. Food and Drug Administration (FDA) and other partners to ensure the highest safety standards for flu vaccines.

The most common side effects of flu vaccines are mild.

The flu vaccine cannot cause flu illness; however, it can cause mild side effects that may be mistaken for flu. Common side effects from the flu shot include soreness, redness, and/or swelling from the shot, headache, fever, muscle aches, and nausea. These side effects are NOT the flu. If experienced at all, these effects are usually mild and last only 1-2 days.

Even if I get sick, won't I recover quickly?

Not necessarily. Influenza can be serious and anyone can become sick with flu and experience serious complications, including active and healthy kids, teens and adults. Even if you bounce back quickly, however, others around you might not be so lucky. You could spread your illness to someone who is more vulnerable to flu. Some people can be infected with the flu virus, but have no symptoms. During this time, you can still spread the virus to others. Don't be the one spreading flu to those you care about.

Can't I wait and get vaccinated when/if flu hits my community?

It is best to get vaccinated before flu begins to spread. It takes about two weeks after vaccination for antibodies to develop in the body and provide protection against the flu, so the sooner you get vaccinated, the more likely it is that you will be protected once flu begins to circulate in your community.

Flu vaccines can't give you the flu.

Even if you got a flu vaccine, there are reasons why you might still get flu or a flu-like illness.

- You may have been exposed to a non-flu virus. The flu vaccine can only prevent illnesses caused by flu viruses. It cannot protect against other viruses that may cause symptoms similar to flu, like the common cold.
- You might have been exposed to flu after you got vaccinated, but before the vaccine took effect. It takes about two weeks after you receive the vaccine for your body to build protection against the flu.
- You may have been exposed to an influenza virus that was very different from the viruses included in that year's vaccine. The flu vaccine protects against the influenza viruses that research indicates will cause the most disease during the upcoming season, but there can be other flu viruses circulating.
- Unfortunately, however, some people who get a flu vaccine may still get sick. How well the flu vaccine works (or its ability to prevent flu) can range from season to season and also can vary depending on who is being vaccinated. However, if you do get sick, flu vaccination might make your illness milder than it would have been otherwise

Don't avoid getting a flu vaccine because you don't like shots.

The minor pain of a flu shot is nothing compared to the suffering that can be caused by the flu. A flu vaccine reduces your risk of illness, hospitalization, and can prevent you from spreading the virus to your loved ones. So, whatever little discomfort you feel from the minor side effects of the flu shot is worthwhile to avoid the flu.

You need to get a flu vaccine every year.

There are two reasons for getting a flu vaccine every year:

- a) Flu viruses are constantly changing and so flu vaccines may be updated from one season to the next. You need the current season's vaccine for the best protection.
- b) A person's immune protection from the vaccine declines over time. Annual vaccination is needed for the best protection.

Get a Flu Vaccine

- Flu vaccines are offered in many locations. Even if you don't have a regular doctor or nurse, you can get a flu vaccine somewhere else, including doctor's offices, clinics, health departments, retail stores, pharmacies, and health centers, as well as by many employers and schools.
- Use the vaccine finder at <http://vaccine.healthmap.org/> to find a flu vaccination clinic near you.

For more information, visit <http://www.cdc.gov/flu> or call 1-800-CDC-INFO (800-232-4636).

Support Groups @ Englewood Hospital

Englewood Hospital Events Calendar

Please check Englewood Hospital's Calendar of Events link for upcoming events at

<https://www.EnglewoodHealth.org/calendar-events-classes>

Bariatric/Weight Loss Surgery Support Group

A free program for patients who have experienced the surgical solution to weight loss. If you are considering surgery, you are also welcome to join the group. The support group meets on the first Tuesday of each month at 6pm.

Bereavement Support Group

VNA of Englewood: Bereavement Support Group runs on Thursdays from 12pm – 1:30 pm at Englewood Hospital. Please check with the hospital main desk for the location on each Thursday. For additional information, please call Erica DiFrancisco at 201-894-333, group facilitator.

Cancer Support:

Breast Cancer Support Group

Relax your mind as you connect with other women living with breast cancer. Open to all women experiencing any stage of breast cancer. First timers should call Cathy Verhulst at 201-608-2162 prior to attending. The support group meets the first and third Friday of every month at 10:30 am.

Oral, Head and Neck Cancer Support Group

SPOHNC (Support for People with Oral, Head and Neck Cancer), a patient directed, self-help organization founded in 1991 by an oral cancer survivor. It is non-profit organization dedicated to meeting the emotional, physical and humanistic needs of oral head and neck cancer patients and their care givers. Bergen County Chapter meets from 7pm – 8:30pm at Englewood Hospital on the fourth Wednesday of the month in conference room "A". For inquiries, please contact Patrick Taaffee at 201-931-6394.

Cardiac – Visiting Hearts: A Support Program for Cardiac Patients

New patients are informed of the "Visiting Hearts" program prior to their day of Pre-Admission Testing. For more information, please call Robyn Giaccone at 201-894-3950.

Diabetes Education

A free program is open to individuals and their families. This group allows participants to share their experiences, learn from others and discuss how they live with diabetes. Guest speakers are often featured. This group meets on the fourth Tuesday of every month from 7pm – 8:30pm. (No meetings in July and August). An Insulin Pump Support Group is held quarterly for those using an insulin pump, those interested in pump therapy, and those using multiple daily injections. To schedule an appointment or for additional information, please call 201-894-3335.

Support Groups @ Englewood Hospital

Families Anonymous

Families Anonymous is a group of concerned relatives and friends whose lives have been adversely affected by a loved one's addiction to alcohol, drugs or related behavioral problems. All who have experienced the effects of a loved one's addiction are welcome.

The group meets at Englewood Hospital every Friday at 7:30pm. Call 917-836-3672 or email gerilam@msn.com for more information.

Neuropathy Support Group

This group meets on the third Thursday of March, April, May September, October and November at 7pm. Call Rich Booz at 201-587-1250, Mary Robertson at 973-226-1535, Tom McCullum at 201-692-9313 or Dean Lewis at 631-223-8416 for additional information.

Post Partum Services / Wellness Wednesdays

You and your newborn child are invited to attend our group, focused on adjustment to motherhood, coping with stress, and adapting to new family dynamics. A licensed clinical social worker facilitates the sessions, which provide comfort, emotional support, information, and referrals to resources for new moms who are adjusting to parenthood. The group meets every Wednesday at 1pm. Registration is required. Call 201-894-3092.

Support Groups @ Holy Name Medical Center

Free Support Groups meet monthly. To register call 1-877-465-9626, unless otherwise noted.

Bariatric Support Group

Support Group for Lap-band or Gastric Bypass patients

Location: Conference Room "1", Marian Hall Holy Name Medical Center. For additional information, please call 201-833-3336

Bereavement Support

Call 201-833-3000 ext 7580 for more information.

Breast Cancer Support and Discussion Group

The Breast Cancer Support and Discussion Group is a vehicle for information, encouragement and support that is facilitated by two clinical psychologists. The support group meets on the first and third Wednesday of every month at 5:30pm – 6:30pm.

Call 201-227-6008 for additional information. Registration is encouraged, but not required. Walk-ins are welcome.

Cancer Support Group

The Cancer Support Group provides an opportunity to meet with people who understand how you feel and what you are going through in a way that others cannot. The support group meets on the second and fourth Tuesday at 4:00pm – 5:00pm. The meetings take place in the Marian Hall Conference Center, Holy Name Medical Center. For additional information, please call 201-227-6008.

Support Groups @ Holy Name Medical Center

Men Living with Cancer Support Group

The Men Living with Cancer Support Group is open to men with the diagnosis of cancer at any time during treatment or post-therapy. For additional information, please call 201-833-3392.

Support for Korean Cancer Patients

The Support group meets at Medical Affairs Conference Room, Holy Name Medical Center on the first Friday of every month at 10am – 12pm. For additional information, please call Hei Young Yoon at 201-833-3332.

Pregnancy and Newborn Loss Support Group

The support group meets on the first Tuesday of each month at 8:00pm. For additional information, please call 201-724-4093.

Blood Drive at Holy Name Medical Center

You can sign up for the blood drives online: <http://holyname.org/BloodDrive/>

Local Support Group - Miscellaneous

Dental Care at Southeast for Independent Living (SESCIL)

The Southeast Senior Center for Independent Living has fully equipped dental facility with a certified licensed dentist, a dental coordinator, and two dental hygienists, excellent equipment and a clean environment. The Gallen Adult Day Care Center at the Jewish Home at Rockleigh will hold a

Caregiver support group every first Wednesday of the month, 10am – 11:30 am at 10 Link Drive, Rockleigh, NJ – Social Hall 1. FREE.

For additional information, please call Social Worker Shelley at 201-784-1414 ext. 5340. Share concerns in an informative group discussion and learn about available resources for you and your loved one.

Treatment Services

Seabrook House – Helping Families Find the Courage to Recover

Seabrook House is multi-level premier inpatient and outpatient facility, internationally recognized, and accredited by CARF (Commission on Accreditation of Rehabilitation Services), alcohol and drug rehabilitation center. Each facility offers every level of inpatient and outpatient care from partial through one-on-one counseling.

They offer the following services: Withdrawal Management (Detoxification), Residential Treatment, Partial Hospitalization, and Intensive Outpatient. They also offer Extended Care Programs: Seabrook House West, Changes for Women/Young Adult Program, Recovery Enhancement Program. They offer “The Family Matrix Program”, a three-day, structured experience designed to help families begin to heal and strengthen the bonds strained by addiction. They provide Holistic Approaches to Treatment such as Equin Therapy, Music Therapy, Yoga, Acupuncture, and many more. Please call for details. Seabrook House accepts many health insurance programs.

Treatment is covered by most insurances. For more information, visit www.Seabrookhouse.org or call 800-761-7575 ext. 1515

8 TIPS FOR IMPROVING COMMUNICATION

WHEN WEARING A FACE COVERING

BE AWARE

Is the person you're communicating with having trouble understanding you? Ask and adapt if needed.

BE PATIENT

Face coverings block visual cues and muffle sounds that help us understand speech, which can make interactions frustrating.

BE MINDFUL

Consider how physical distancing might affect your communication. As distance increases, sound levels decrease, and visual cues are more difficult to see.

BE LOUD AND CLEAR

Speak up, but don't shout. Focus on speaking clearly. Consider wearing a clear face covering, if possible. If you're having trouble understanding, ask the person you're talking with to speak louder. If you lip-read, ask those you interact with regularly to wear a clear face covering.

TURN DOWN THE BACKGROUND VOLUME

Background noise can make conversation especially hard. When possible, move to a quieter spot or turn down the sound.

COMMUNICATE ANOTHER WAY

Use a smartphone talk-to-text application or writing tools (paper/pen, whiteboard) to communicate.*

CONFIRM THAT YOUR STATEMENT IS CLEAR

Ask if your message has been understood.

BRING A FRIEND OR BE A FRIEND

If it's essential that you comprehend important spoken details—during a discussion with a health care provider, for example—consider bringing a friend or family member with you. Or, offer to come along to listen and take notes when a friend has an important appointment or meeting.
