

Alzheimer's & Brain Awareness Month

Memory loss that disrupts daily life may be a symptom of Alzheimer's or other dementia. **Alzheimer's** is a brain disease that causes a slow decline in memory, thinking and reasoning skills. **Dementia** is not a specific disease. It's an overall term that describes a group of symptoms. *If you notice any of them, don't ignore them. Schedule an appointment with your doctor.*

10 Early Signs and Symptoms of Alzheimer's:

- 1 Memory loss that disrupts daily life.
- 2 Challenges in planning or solving problems.
- 3 Difficulty completing familiar tasks.
- 4 Confusion with time or place.
- 5 Trouble understanding visual images and spatial relationships.
- 6 New problems with words in speaking or writing.
- 7 Misplacing things and losing the ability to retrace steps.
- 8 Decreased or poor judgment.
- 9 Withdrawal from work or social activities.
- 10 Changes in mood and personality.

✓ **Early Detection Matters.** With early detection, you can explore treatments that may provide some relief of symptoms and help you maintain a level of independence longer, as well as increase your chances of participating in clinical drug trials that help advance research. Aphasia 101

Aphasia is an acquired communication disorder, which means that it's something that happens during the course of life instead of being present from birth. It affects the person's ability to process language but does not affect intelligence. While it is more common in older people, it can be acquired following a stroke or brain trauma at any age.

The most common cause of aphasia is a stroke. About 25% - 40% of stroke survivors acquire aphasia. Other causes include traumatic brain injury or a brain tumor. Additionally, with primary progressive aphasia, there is a neurological cause.

Aphasia-friendly communication tips and tools can be summed up with this acrostic for the word "aphasia":

- A: ask** simple, direct questions
 - P: provide** multiple communication options
 - H: help** communicate if asked
 - A: acknowledge** frustration
 - S: speak** slowly and clearly
 - I: if** you don't understand, say so
 - A: allow** extra time

June 21 Happy Father's Day

For all you do and all you are, we love you.

STAY SAFE  TAKE CARE OF EACH OTHER

Men: Take Charge of Your Health

Use these tips to improve your health:

- ✓ **See a doctor for regular checkups even if you feel healthy.** This is important because some diseases and health conditions don't have symptoms at first.
- ✓ **Here are some more things you can do to take care of your health:**
 - Eat healthy and get active.
 - If you drink alcohol, drink only in moderation.
 - Quit smoking.
- ✓ **Small changes can add up to big results.** Here are some examples:
 - Take a walk instead of smoking a cigarette.
 - Try a green salad instead of fries.
 - Drink water instead of soda or juice.
- ✓ **Don't be embarrassed to talk about your health.** Start by talking to family members to find out which diseases run in your family.
- ✓ **Get preventive care to stay healthy.** Doctors provide *screening tests and shots* that help keep you from getting sick and it also helps to find problems early, when they may be easier to treat. **Screenings** are medical tests that check for diseases and health conditions before they cause any signs or symptoms. Depending on your age and medical history, you may need to be screened for things like: certain types of cancer, high blood pressure or high cholesterol, mental health conditions, like depression.
- ✓ **Stay up to date on your shots.** Everyone needs shots (vaccines) to stay healthy. *Ask your doctor or nurse which shots you need to stay healthy* – then make sure you stay up to date.

10 WAYS TO LOVE YOUR BRAIN

START NOW. It's never too late or too early to incorporate healthy habits.

HIT THE BOOKS

Formal education will help reduce risk of cognitive decline and dementia. Take a class at a local college, community center or online.

BUTT OUT

Smoking increases risk of cognitive decline. Quitting smoking can reduce risk to levels comparable to those who have not smoked.

FOLLOW YOUR HEART

Risk factors for cardiovascular disease and stroke – obesity, high blood pressure and diabetes – negatively impact your cognitive health.

BREAK A SWEAT

Engage in regular cardiovascular exercise that elevates heart rate and increases blood flow. Studies have found that physical activity reduces risk of cognitive decline.

STUMP YOURSELF

Challenge your mind. Build a piece of furniture. Play games of strategy, like bridge.

HEADS UP!

Brain injury can raise risk of cognitive decline and dementia. Wear a seat belt and use a helmet when playing contact sports or riding a bike.

Growing evidence indicates that people can reduce their risk of cognitive decline by adopting key lifestyle habits. When possible, combine these habits to achieve maximum benefit for the brain and body.

BUDDY UP

Staying socially engaged may support brain health. Find ways to be part of your local community or share activities with friends and family.

TAKE CARE OF YOUR MENTAL HEALTH

Some studies link depression with cognitive decline, so seek treatment if you have depression, anxiety or stress.

CATCH SOME ZZZ'S

Not getting enough sleep may result in problems with memory and thinking.

FUEL UP RIGHT

Eat a balanced diet that is higher in vegetables and fruit to help reduce the risk of cognitive decline.

Visit alz.org/10ways to learn more.

THE BRAINS BEHIND SAVING YOURS®

Support Groups @ Englewood Hospital

Englewood Hospital Events Calendar

Please check Englewood Hospital's Calendar of Events link for upcoming events at <https://www.engagewoodhealth.org/calendar-events-classes>

Bariatric/Weight Loss Surgery Support Group

A free program for patients who have experienced the surgical solution to weight loss. If you are considering surgery, you are also welcome to join the group. The support group meets on the first Tuesday of each month at 6pm.

Bereavement Support Group

VNA of Englewood: Bereavement Support Group runs on Thursdays from 12pm – 1:30 pm at Englewood Hospital. Please check with the hospital main desk for the location on each Thursday. For additional information, please call Erica DiFrancisco at 201-894-333, group facilitator.

Cancer Support:

Breast Cancer Support Group

Relax your mind as you connect with other women living with breast cancer. Open to all women experiencing any stage of breast cancer. First timers should call Cathy Verhulst at 201-608-2162 prior to attending. The support group meets the first and third Friday of every month at 10:30 am.

Oral, Head and Neck Cancer Support Group

SPOHNC (Support for People with Oral, Head and Neck Cancer), a patient directed, self-help organization founded in 1991 by an oral cancer survivor. It is non-profit organization dedicated to meeting the emotional, physical and humanistic needs of oral head and neck cancer patients and their care givers. Bergen County Chapter meets from 7pm – 8:30pm at Englewood Hospital on the fourth Wednesday of the month in conference room "A". For inquiries, please contact Patrick Taaffee at 201-931-6394.

Cardiac – Visiting Hearts: A Support Program for Cardiac Patients

New patients are informed of the "Visiting Hearts" program prior to their day of Pre-Admission Testing. For more information, please call Robyn Giaccone at 201-894-3950.

Diabetes Education

A free program is open to individuals and their families. This group allows participants to share their experiences, learn from others and discuss how they live with diabetes. Guest speakers are often featured. This group meets on the fourth Tuesday of every month from 7pm – 8:30pm. (No meetings in July and August). An Insulin Pump Support Group is held quarterly for those using an insulin pump, those interested in pump therapy, and those using multiple daily injections. To schedule an appointment or for additional information, please call 201-894-3335.

Support Groups @ Englewood Hospital

Families Anonymous

Families Anonymous is a group of concerned relatives and friends whose lives have been adversely affected by a loved one's addiction to alcohol, drugs or related behavioral problems. All who have experienced the effects of a loved one's addiction are welcome.

The group meets at Englewood Hospital every Friday at 7:30pm. Call 917-836-3672 or email gerilam@msn.com for more information.

Neuropathy Support Group

This group meets on the third Thursday of March, April, May September, October and November at 7pm. Call Rich Booz at 201-587-1250, Mary Robertson at 973-226-1535, Tom McCullum at 201-692-9313 or Dean Lewis at 631-223-8416 for additional information.

Post Partum Services / Wellness Wednesdays

You and your newborn child are invited to attend our group, focused on adjustment to motherhood, coping with stress, and adapting to new family dynamics. A licensed clinical social worker facilitates the sessions, which provide comfort, emotional support, information, and referrals to resources for new moms who are adjusting to parenthood. The group meets every Wednesday at 1pm. Registration is required. Call 201-894-3092.

Support Groups @ Holy Name Medical Center

Free Support Groups meet monthly. To register call 1-877-465-9626, unless otherwise noted.

Bariatric Support Group

Support Group for Lap-band or Gastric Bypass patients

Location: Conference Room "1", Marian Hall Holy Name Medical Center. For additional information, please call 201-833-3336

Bereavement Support

Call 201-833-3000 ext 7580 for more information.

Breast Cancer Support and Discussion Group

The Breast Cancer Support and Discussion Group is a vehicle for information, encouragement and support that is facilitated by two clinical psychologists. The support group meets on the first and third Wednesday of every month at 5:30pm – 6:30pm.

Call 201-227-6008 for additional information. Registration is encouraged, but not required. Walk-ins are welcome.

Cancer Support Group

The Cancer Support Group provides an opportunity to meet with people who understand how you feel and what you are going through in a way that others cannot. The support group meets on the second and fourth Tuesday at 4:00pm – 5:00pm. The meetings take place in the Marian Hall Conference Center, Holy Name Medical Center. For additional information, please call 201-227-6008.

Support Groups @ Holy Name Medical Center

Men Living with Cancer Support Group

The Men Living with Cancer Support Group is open to men with the diagnosis of cancer at any time during treatment or post-therapy. For additional information, please call 201-833-3392.

Support for Korean Cancer Patients

The Support group meets at Medical Affairs Conference Room, Holy Name Medical Center on the first Friday of every month at 10am – 12pm. For additional information, please call Hei Young Yoon at 201-833-3332.

Pregnancy and Newborn Loss Support Group

The support group meets on the first Tuesday of each month at 8:00pm. For additional information, please call 201-724-4093.

Blood Drive at Holy Name Medical Center

You can sign up for the blood drives online: <http://holyname.org/BloodDrive/>

Local Support Group - Miscellaneous

Dental Care at Southeast for Independent Living (SESCIL)

The Southeast Senior Center for Independent Living has fully equipped dental facility with a certified licensed dentist, a dental coordinator, and two dental hygienists, excellent equipment and a clean environment. Call the Center for an appointment. There is an annual membership fee which entitles the member not only to receive dental care at cost but includes participation in all other class offerings. Caregiver support group every first Wednesday of the month, 10am – 11:30 am at 10 Link Drive, Rockleigh, NJ – Social Hall 1. FREE.

For additional information, please call Social Worker Shelley at 201-784-1414 ext. 5340. Share concerns in an informative group discussion and learn about available resources for you and your loved one.

Treatment Services

Seabrook House – Helping Families Find the Courage to Recover

Seabrook House is multi-level premier inpatient and outpatient facility, internationally recognized, and accredited by CARF (Commission on Accreditation of Rehabilitation Services), alcohol and drug rehabilitation center. Each facility offers every level of inpatient and outpatient care from partial through one-on-one counseling.

They offer the following services: Withdrawal Management (Detoxification), Residential Treatment, Partial Hospitalization, and Intensive Outpatient. They also offer Extended Care Programs: Seabrook House West, Changes for Women/Young Adult Program, Recovery Enhancement Program. They offer “The Family Matrix Program”, a three-day, structured experience designed to help families begin to heal and strengthen the bonds strained by addiction. They provide Holistic Approaches to Treatment such as Equin Therapy, Music Therapy, Yoga, Acupuncture, and many more. Please call for details. Seabrook House accepts many health insurance programs.

Treatment is covered by most insurances. For more information, visit www.Seabrookhouse.org or call 800-761-7575 ext. 1515

Use of Cloth Face Coverings to Help Slow the Spread of COVID-19

How to Wear Cloth Face Coverings

Cloth face coverings should—

- fit snugly but comfortably against the side of the face
- be secured with ties or ear loops
- include multiple layers of fabric
- allow for breathing without restriction
- be able to be laundered and machine dried without damage or change to shape

CDC on Homemade Cloth Face Coverings

CDC recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies), **especially** in areas of significant community-based transmission.

CDC also advises the use of simple cloth face coverings to slow the spread of the virus and help people who may have the virus and do not know it from transmitting it to others. Cloth face coverings fashioned from household items or made at home from common materials at low cost can be used as an additional, voluntary public health measure.

Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the cloth face covering without assistance.

The cloth face coverings recommended are not surgical masks or N-95 respirators. Those are critical supplies that must continue to be reserved for healthcare workers and other medical first responders, as recommended by current CDC guidance.

Should cloth face coverings be washed or otherwise cleaned regularly? How regularly?

Yes. They should be routinely washed depending on the frequency of use.

How does one safely sterilize/clean a cloth face covering?

A washing machine should suffice in properly washing a cloth face covering.

How does one safely remove a used cloth face covering?

Individuals should be careful not to touch their eyes, nose, and mouth when removing their cloth face covering and wash hands immediately after removing.

Sewn Cloth Face Covering

Materials

- Two 10"x6" rectangles of cotton fabric
- Two 6" pieces of elastic (or rubber bands, string, cloth strips, or hair ties)
- Needle and thread (or bobby pin)
- Scissors
- Sewing machine

Tutorial

1. Cut out two 10-by-6-inch rectangles of cotton fabric. Use tightly woven cotton, such as quilting fabric or cotton sheets. T-shirt fabric will work in a pinch. Stack the two rectangles; you will sew the cloth face covering as if it was a single piece of fabric.

2. Fold over the long sides $\frac{1}{4}$ inch and hem. Then fold the double layer of fabric over $\frac{1}{2}$ inch along the short sides and stitch down.

3. Run a 6-inch length of $\frac{1}{8}$ -inch wide elastic through the wider hem on each side of the cloth face covering. These will be the ear loops. Use a large needle or a bobby pin to thread it through. Tie the ends tight. Don't have elastic? Use hair ties or elastic head bands. If you only have string, you can make the ties longer and tie the cloth face covering behind your head.

4. Gently pull on the elastic so that the knots are tucked inside the hem. Gather the sides of the cloth face covering on the elastic and adjust so the mask fits your face. Then securely stitch the elastic in place to keep it from slipping.

Quick Cut T-shirt Cloth Face Covering (no sew method)

Materials

- T-shirt
- Scissors

Tutorial

Bandana Cloth Face Covering (no sew method)

Materials

- Bandana (or square cotton cloth approximately 20"x20")
- Rubber bands (or hair ties)
- Scissors (if you are cutting your own cloth)

Tutorial
