

What Happens When Your Thyroid Doesn't Work Correctly?

The **thyroid** is the small, butterfly-shaped gland in your neck. It does a lot for your body. It makes hormones that keep organs running properly. It also controls the way you use energy. But sometimes

this powerful gland doesn't work like it's supposed to. One common thyroid condition, called **hyperthyroidism**, causes the thyroid to make more hormones than the body needs.

But the most common thyroid disorder is **hypothyroidism**. This condition causes a lack of hormone, which leads the thyroid to slow down.

Symptoms and Diagnosis

❄ People with hypothyroidism often gain weight and feel tired, but some may not have any symptoms at all. A person with mild hypothyroidism might feel fine and have no symptoms. But those with symptoms can experience a puffy face, sluggishness, weight gain, feeling cold, a slowed heart rate, constipation, depression, and thinning hair.

❄ A doctor can diagnose hypothyroidism and help people manage it. The doctor will ask about your symptoms, do a physical exam, and order blood tests. These tests measure your TSH, or thyroid stimulating hormone, level and antibodies.

A Guide to Radon

Radon is a cancer-causing, radioactive gas. You can't see radon, you can't smell it or taste it. It is the second leading cause of lung cancer. Only smoking causes more lung cancer deaths. If you smoke and your home has high radon

levels, your risk of lung cancer is especially high. *Your chances of getting lung cancer from radon depend mostly on:*

- How much radon is in your home
- The amount of time you spend in your home
- Whether you are a smoker or have ever smoked

EPA (Environmental Protection Agency) Recommends:

- Test your home for radon - it's easy and inexpensive.
- Fix your home if your radon level is 4 pico curies per litre (pCi/L) or higher. Radon levels less than 4 pCi/L still pose a risk, and in many cases may be reduced.

The amount of radon in the air is measured in "picocuries per liter of air," or "pCi/L." There are many kinds of low-cost "do it yourself" radon test kits you can get through the mail and in some hardware stores and other retail outlets. If you prefer, or if you are buying or selling a home, you can hire a qualified tester to do the testing for you.

FIGHT FLU

Start the New Year Right! Get a Flu Vaccine.

Make an appointment to schedule your flu shot today.

Cervical Cancer is Preventable!

Even though screening works, over 8 million women in the U.S. weren't screened in the past five years, as recommended.

Are you one of them?

The **Pap test** screens for abnormal cells and the **HPV test** screens for the human

papillomavirus that can cause these cell changes. **HPV vaccination** helps prevent infection with the human papillomavirus types that cause most cervical cancers. Both boys and girls need the HPV vaccination series. Ask your doctor what cervical cancer screening tests are best for you. Also, get your adolescent sons and daughters vaccinated against HPV to help prevent cervical and other cancers.

No woman should die of cervical cancer.

What is Glaucoma?

Glaucoma is an eye disease that can cause vision loss and blindness if left untreated. It often has no symptoms in its early stages but can be diagnosed early with a comprehensive dilated eye exam.

How Do I know If I Have Glaucoma?

At first, glaucoma has no symptoms. Vision stays normal and you feel no pain. As the disease worsens, your side vision may begin to fail. Although you may see objects that are straight ahead clearly, you may miss objects to the side. An eye care professional is the only person who can tell you whether you have glaucoma. Don't wait until you notice changes to your vision. If you're at higher risk for glaucoma, visit an eye care professional for a comprehensive dilated eye exam every one to two years.

❄ REMINDERS for Your Office Visit ❄

- Bring your **prescription bottles** or **list of medication** to your visit.
- Do you need **medication refills**? Tell us at your office visit.
- Did you let us know if you have **any change(s) in your personal information** such as address, phone number and insurance?
- Do you need a **Referral for a Specialist** or do you need **further testing outside of our office**? You may need to call your insurance plan to verify your coverage.
- Did you check if your plan **covers Well care or a Physical**?
- Are you up-to-date on your screenings for **Mammogram and Colonoscopy**? **Are you due for one?** Ask your MD.
- Are you being referred by your PCP to get any **radiology test(s)**? If so, please let us know in case you need a **Pre-certification**.
- Is your **Immunization record** up to date? Please update us.
- Are you **Pre-Diabetic**? Have you discussed this with your MD?
- Did you get a **Summary of your Visit** today? If not, please ask for it before leaving.
- Do you need to make a **Follow-up appointment**? **Please stop at Check-out and make an appointment before you leave.**

Start *simple* with **MyPlate** **Food Planning** *during the* **Coronavirus Pandemic**

During a pandemic, you may be taking extra precautions to keep you and your family safe and prepared, including making sure you have everything you need at home. This guide contains information on food planning, including what to buy, how much to buy, and preparation tips.

Check what you have at home first

Take a look at the foods you already have in your refrigerator, freezer, and pantry before you make a list; make sure to look at expiration dates and best by dates. This can help you plan meals around what you already have, and will help you limit the number of trips to the grocery store and avoid spending money on items you don't need.

Make a shopping list

Shopping may feel more stressful at this time. Make a list ahead of time to stay focused, get the items you need, and keep your shopping trip short. Since stores may not have some specific items, create a list with general items like "fruit" or "bread."

Explore your shopping options

Many grocery stores offer in-store pickup, curbside pickup, or delivery. Third party options also exist for grocery store delivery. You may find these services helpful during times of social distancing. If you are older, check if your store delivers or has early shopping hours for older Americans only.

How much should I buy?

Buy what you and your family need at this time, and resist the urge to buy in much larger quantities. Prepare a shopping list that will cover you and everyone in your household for 2 weeks.

Include fresh, frozen, and non-perishable items

Plan for a mix of fresh, frozen, and shelf-stable foods. Eat your fresh food first. Stock your freezer and pantry with items you can eat in the second week and beyond.

Food Planning *during the* Coronavirus Pandemic

What foods should I buy?

Choose a mix of shelf-stable, frozen, and fresh foods. Examples of shelf-stable include pastas, rice, legumes, nut butters, and dried and canned goods. Frozen options to think about might be breads, meats, vegetables, fruits, and even milk. With fresh foods, buy a variety in quantities that you would normally buy. Remember to include the special needs of all family members, including pets, infants, or those with dietary restrictions.

What should I make?

While everyone is home together, you may feel inclined to try a new recipe or experiment with new flavors to keep things interesting. For others, sticking to simple items or familiar foods and tastes provides comfort. Plan what works for you and your family.

Access to food while school is closed

Many school districts across the country are continuing to provide meals to students in need during school closures. Check for local programs in your area, such as [Meals to You](#). Contact your local school to learn about meals that may be available through pop-up food systems, grab-and-go meal pickups, or school bus routes.

Support Groups @ Englewood Hospital

Englewood Hospital Events Calendar

Please check Englewood Hospital's Calendar of Events link for upcoming events at

<https://www.EnglewoodHealth.org/calendar-events-classes>

Bariatric/Weight Loss Surgery Support Group

A free program for patients who have experienced the surgical solution to weight loss. If you are considering surgery, you are also welcome to join the group. The support group meets on the first Tuesday of each month at 6pm.

Bereavement Support Group

VNA of Englewood: Bereavement Support Group runs on Thursdays from 12pm – 1:30 pm at Englewood Hospital. Please check with the hospital main desk for the location on each Thursday. For additional information, please call Erica DiFrancisco at 201-894-333, group facilitator.

Cancer Support:

Breast Cancer Support Group

Relax your mind as you connect with other women living with breast cancer. Open to all women experiencing any stage of breast cancer. First timers should call Cathy Verhulst at 201-608-2162 prior to attending. The support group meets the first and third Friday of every month at 10:30 am.

Oral, Head and Neck Cancer Support Group

SPOHNC (Support for People with Oral, Head and Neck Cancer), a patient directed, self-help organization founded in 1991 by an oral cancer survivor. It is non-profit organization dedicated to meeting the emotional, physical and humanistic needs of oral head and neck cancer patients and their care givers. Bergen County Chapter meets from 7pm – 8:30pm at Englewood Hospital on the fourth Wednesday of the month in conference room "A". For inquiries, please contact Patrick Taaffee at 201-931-6394.

Cardiac – Visiting Hearts: A Support Program for Cardiac Patients

New patients are informed of the "Visiting Hearts" program prior to their day of Pre-Admission Testing. For more information, please call Robyn Giaccone at 201-894-3950.

Diabetes Education

A free program is open to individuals and their families. This group allows participants to share their experiences, learn from others and discuss how they live with diabetes. Guest speakers are often featured. This group meets on the fourth Tuesday of every month from 7pm – 8:30pm. (No meetings in July and August). An Insulin Pump Support Group is held quarterly for those using an insulin pump, those interested in pump therapy, and those using multiple daily injections. To schedule an appointment or for additional information, please call 201-894-3335.

Support Groups @ Englewood Hospital

Families Anonymous

Families Anonymous is a group of concerned relatives and friends whose lives have been adversely affected by a loved one's addiction to alcohol, drugs or related behavioral problems. All who have experienced the effects of a loved one's addiction are welcome.

The group meets at Englewood Hospital every Friday at 7:30pm. Call 917-836-3672 or email gerilam@msn.com for more information.

Neuropathy Support Group

This group meets on the third Thursday of March, April, May September, October and November at 7pm. Call Rich Booz at 201-587-1250, Mary Robertson at 973-226-1535, Tom McCullum at 201-692-9313 or Dean Lewis at 631-223-8416 for additional information.

Post Partum Services / Wellness Wednesdays

You and your newborn child are invited to attend our group, focused on adjustment to motherhood, coping with stress, and adapting to new family dynamics. A licensed clinical social worker facilitates the sessions, which provide comfort, emotional support, information, and referrals to resources for new moms who are adjusting to parenthood. The group meets every Wednesday at 1pm. Registration is required. Call 201-894-3092.

Support Groups @ Holy Name Medical Center

Free Support Groups meet monthly. To register call 1-877-465-9626, unless otherwise noted.

Bariatric Support Group

Support Group for Lap-band or Gastric Bypass patients

Location: Conference Room "1", Marian Hall Holy Name Medical Center. For additional information, please call 201-833-3336

Bereavement Support

Call 201-833-3000 ext 7580 for more information.

Breast Cancer Support and Discussion Group

The Breast Cancer Support and Discussion Group is a vehicle for information, encouragement and support that is facilitated by two clinical psychologists. The support group meets on the first and third Wednesday of every month at 5:30pm – 6:30pm.

Call 201-227-6008 for additional information. Registration is encouraged, but not required. Walk-ins are welcome.

Cancer Support Group

The Cancer Support Group provides an opportunity to meet with people who understand how you feel and what you are going through in a way that others cannot. The support group meets on the second and fourth Tuesday at 4:00pm – 5:00pm. The meetings take place in the Marian Hall Conference Center, Holy Name Medical Center. For additional information, please call 201-227-6008.

Support Groups @ Holy Name Medical Center

Men Living with Cancer Support Group

The Men Living with Cancer Support Group is open to men with the diagnosis of cancer at any time during treatment or post-therapy. For additional information, please call 201-833-3392.

Support for Korean Cancer Patients

The Support group meets at Medical Affairs Conference Room, Holy Name Medical Center on the first Friday of every month at 10am – 12pm. For additional information, please call Hei Young Yoon at 201-833-3332.

Pregnancy and Newborn Loss Support Group

The support group meets on the first Tuesday of each month at 8:00pm. For additional information, please call 201-724-4093.

Blood Drive at Holy Name Medical Center

You can sign up for the blood drives online: <http://holyname.org/BloodDrive/>

Local Support Group - Miscellaneous

Dental Care at Southeast for Independent Living (SESCIL)

They also offer Extended Care Programs: Seabrook House West, Changes for Women/Young Adult Program, Recovery Enhancement Program. They offer “The Family Matrix Program”, a three-day, structured experience designed to help families begin to heal and strengthen the bonds strained by addiction. They provide Holistic Approaches to Treatment such as Equin Therapy, Music Therapy, Yoga, Acupuncture, and many more. Please call for details. Seabrook House accepts many health insurance programs.

Treatment is covered by most insurances. For more information, visit www.Seabrookhouse.org or call 800-761-7575 ext. 1515

3 Key Steps to Take While Waiting for Your COVID-19 Test Result

To help stop the spread of COVID-19, take these **3 key steps NOW** while waiting for your test results:

1 Stay home and monitor your health.

Stay home and monitor your health to help protect your friends, family, and others from possibly getting COVID-19 from you.

Stay home and away from others:

- If possible, stay away from others, especially people who are at higher risk for getting very sick from COVID-19, such as older adults and people with other medical conditions.
- If you have been in contact with someone with COVID-19, stay home and away from others for 14 days after your last contact with that person.
- If you have a fever, cough or other symptoms of COVID-19, stay home and away from others (except to get medical care).

Monitor your health:

- Watch for fever, cough, shortness of breath, or other symptoms of COVID-19. Remember, symptoms may appear 2-14 days after exposure to COVID-19 and can include:
 - Fever or chills
 - Cough
 - Shortness of breath or difficulty breathing
 - Tiredness
 - Muscle or body aches
 - Headache
 - New loss of taste or smell
 - Sore throat
 - Congestion or runny nose
 - Nausea or vomiting
 - Diarrhea

2 Think about the people you have recently been around.

If you are diagnosed with COVID-19, a public health worker may call you to check on your health, discuss who you have been around, and ask where you spent time while you may have been able to spread COVID-19 to others. While you wait for your COVID-19 test result, think about everyone you have been around recently. This will be important information to give health workers if your test is positive.

Complete the information on the back of this page to help you remember everyone you have been around.

3 Answer the phone call from the health department.

If a public health worker calls you, answer the call to help slow the spread of COVID-19 in your community.

- Discussions with health department staff are **confidential**. This means that your personal and medical information will be kept private and only shared with those who may need to know, like your health care provider.
- Your name will not be shared with those you came in contact with. The health department will only notify people you were in close contact with (within 6 feet for more than 15 minutes) that they might have been exposed to COVID-19.

[cdc.gov/coronavirus](https://www.cdc.gov/coronavirus)

Think About The People You Have Recently Been Around

If you test positive and are diagnosed with COVID-19, someone from the health department may call to check-in on your health, discuss who you have been around, and ask where you spent time while you may have been able to spread COVID-19 to others. This form can help you think about people you have recently been around so you will be ready if a public health worker calls you.

Things to think about. Have you:

- Gone to work or school?
- Gotten together with others (eaten out at a restaurant, gone out for drinks, exercised with others or gone to a gym, had friends or family over to your house, volunteered, gone to a party, pool, or park)?
- Gone to a store in person (e.g., grocery store, mall)?
- Gone to in-person appointments (e.g., salon, barber, doctor's or dentist's office)?
- Ridden in a car with others (e.g., Uber or Lyft) or took public transportation?
- Been inside a church, synagogue, mosque or other places of worship?

Who lives with you?

Who have you been around (within 6 feet for more than 15 minutes) in the last 10 days? (You may have more people to list than the space provided. If so, write on the front of this sheet or a separate piece of paper.)

Name	Phone Number	Date you last saw them	Where you last saw them
------	--------------	------------------------	-------------------------

What have you done in the last 10 days with other people?

Activity	Location	Date
----------	----------	------
